

RADIOGRAPH REPOSITORY TERMS

A radiograph repository (the “repository”) will be available for the benefit of owners and buyers. Any radiographs voluntarily submitted will be available for viewing online by a veterinarian prior to the horse selling. Please have your vet contact Carolyn Ware (940) 682-5208, for assistance with a repository user name and password to access the images.

Participating owners and buyers agree to the following terms:

1. AuctionWare, LLC, will not review radiographs prior to the sale of the horse; makes no representations or warranties of any kind concerning the authenticity, sufficiency, quality, completeness or accuracy of the radiographs (all of which are the responsibility of the owner); and is not responsible or liable for any error, claim or damage as a result of the buyer’s use or reliance on the radiographs.
2. Participating owners are encouraged (but not required) to provide suggested views.
3. If participating, owners may submit radiographs that are dated within 60 days before the first sale session and must submit no later than 12:00 pm CST on the Wednesday of the week before the first sale session.
4. Paragraph 7 of the sale Terms, Warranties, Buying Procedure and Settlement apply to all horses with radiographs.
5. All images submitted to the repository are the property of the owner.

RADIOGRAPH REPOSITORY INFORMATION SHEET

Owners:

1. An online radiograph repository will be available for the benefit of owners and buyers. Participation is VOLUNTARY.

2. Asteris, Inc. will provide veterinarians with an online application for remote radiograph submission. Please have your vet visit www.trihorse.com or contact Asteris, Inc. (877) 727-8374, Extension 403 for information and assistance with the link to the application that will allow the submission of images from his/her system.

All radiographs must be dated within 60 days before the first sale session and must be submitted no later than 12:00 pm CST on the Wednesday of the week before the first sale session.

Given that horses can and do injure themselves, images may be added to the repository for an “area of concern”, if the original upload has already been accomplished. A corresponding report from the veterinarian is required and the images must be added during the regular submission date range.

Owners will be held responsible for associating radiographs with the horse(s). If the horse name is changed in the radiographs knowingly or unknowingly, or if the images have been tampered with, the owner is responsible for any charges incurred from a dispute.

Veterinarians:

The following views are recommended:

Both carpi: DLPMO, PLDMO (just off lateral), flexed lateral medial

Both hocks: Just off DP 10 degrees (slight DLPMO), lateral medial, PLDMO

Both stifles: Lateral medial (getting the proximal tibia as well as the trochlear ridges of the femur and patella) and a plantar anterior as long as the condyles are visible

The following views are suggested:

Both front fetlocks: DP, flexed lateral medial

Both hind fetlocks: DP, standing lateral medial

For horses 2 years and older it is also suggested to have:

the front feet radiographed 60 degree DP and Skyline

Please label the studies in this manner:

Patient = **Lot Number** as it is in the catalog AND **Horse Name** (AQHA Registered Name...NOT Barn Name) are required

Owner = **Consignor**, as listed in the catalog

Neither Asteris, Inc. nor the sales company will be screening images for positioning or technique; this is the responsibility of the veterinarian at the time of acquisition.
