

RADIOGRAPH REPOSITORY

An online radiograph repository (the “repository”) will be available for the benefit of owners and buyers. Any radiographs voluntarily submitted to Asteris Keystone Community will be available for viewing online by a buyer’s veterinarian prior to the horse selling. However, the viewing of the radiographs by the buyer’s designated veterinarian does not relieve the buyer of the responsibility to examine horses carefully prior to bidding.

Auctionware, LLC/Triangle Sales will not review radiographs prior to the sale of the horse; makes no representations or warranties of any kind concerning the authenticity, sufficiency, quality, completeness or accuracy of the radiographs (all of which are the responsibility of the owner); and is not responsible or liable for any error, claim or damage as a result of the buyer’s use or reliance on the radiographs.

Paragraph 7, Right Of Return, in the Conditions Of Sale - Terms, Warranties, Buying Procedure and Settlement applies to all horses with or without radiographs.

All images submitted to the repository are the property of the owner.

RADIOGRAPH REPOSITORY TERMS

Participating owners, bidders, buyers and veterinarians agree to the following terms:

All radiographs must be taken within 60 days of the first sale session and must be submitted no later than 5:00 pm CST, 7 days before the first sale session.

Given that horses can and do injure themselves, images may be added to the repository for an “area of concern”, if the original upload has already been accomplished. A corresponding report from the veterinarian is required and the images must be added during the regular submission date range.

Label For The Studies:

Hip Number (as it is in the catalog), Sire, Dam and Owner (consignor as listed in the catalog)

Any radiographs received that do not clearly describe the horse, owner, veterinarian, and date will be discarded.

Owners will be held responsible for associating radiographs with the horse(s). If the horse name is changed in the radiographs knowingly or unknowingly, or if the images have been tampered with, the owner is responsible for any charges and/or damages incurred from a dispute.

Neither Asteris Keystone Community nor Auctionware, LLC/Triangle Sales will be reviewing or screening images for positioning or technique. This is the responsibility of the submitting veterinarian at the time of acquisition.

The following views are recommended:

Both carpi: DLPMO, PLDMO (just off lateral), flexed lateral medial

Both hocks: Just off DP 10 degrees (slight DLPMO), lateral medial, PLDMO

Both stifles: Lateral medial (getting the proximal tibia as well as the trochlear ridges of the femur and patella) and a plantar anterior, as long as the condyles are visible

The following views are suggested:

Both front fetlocks: DP, flexed lateral medial

Both hind fetlocks: DP, standing lateral medial

For horses 2 years and older it is also suggested to have:

the front feet radiographed 60 degree DP and Skyline
