AQHA HEALTH PANEL TESTING

Genes come in pairs; each parent contributes one copy to the offspring. With respect to the autosomal dominant genetic diseases listed below (HYPP, PSSM, and MH) only one defective gene is necessary to express the genetic disease in question. Such gene can be inherited from either of the parents or from both parents. With respect to autosomal recessive genetic diseases listed below (GBED and HERDA), typically, two copies of an abnormal gene (two copies = 1 pair) must be present for the horse to show signs of the genetic defect in question. Horses with only one copy of the defective gene are considered "carriers".

GBED – Glycogen Branching Enzyme Deficiency. Fatal disease of newborn foals caused by defect in glycogen storage. Affects heart and skeletal muscles and brain. Inherited as a recessive gene.

Possible results:

N/N Normal – horse does not possess the disease-causing GBED gene.

N/G Carrier – Heterozygous (one normal and one GBED gene).
G/G Affected – horse has two copies of the GBED gene.

HERDA — **Hereditary Equine Regional Dermal Asthenia.** Skin disease characterized by hyperextensible skin, scarring, and severe lesions along the back of affected horses. Typical onset is around 2 years of age. Inherited as a recessive disease.

Possible results:

N/N Normal – horse does not have the HERDA gene.
N/HRD Carrier – horse carries one copy of the HERDA gene.
HRD/HRD Affected – horse has two copies of the HERDA gene.

HYPP – Hyperkalemic Periodic Paralysis. Muscle disease caused by defect in sodium channel gene that causes involuntary muscle contraction and increased level of potassium in blood. Inherited as a dominant disease. Two copies of the defective gene produce more severe signs than one copy.

Possible results:

N/N Normal – horse does not possess the disease-causing HYPP gene.
N/H Hyperkalemic – Heterozygous (one normal and one HYPP gene).

H/H Affected – horse has two copies of the HYPP gene.

MH – Malignant Hyperthermia. Rare but life-threatening skeletal muscle disease triggered by exposure to volatile anesthetics (halothane), depolarizing muscle relaxants (succinylcholine), and stress. Presumed inheritance as a dominant disease.

Possible results:

N/N Normal – horse does not have the MH gene.
N/MH Affected – horse has one copy of the MH gene.
MH/MH Affected – horse has two copies of the MH gene.

PSSM1 — **Polysaccharide Storage Myopathy Type 1.** Muscle disease characterized by accumulation of abnormal complex sugars in skeletal muscles. Signs include muscle pain, stiffness, skin twitching, sweating, weakness, and reluctance to move. Inherited as a dominant disease.

Possible results:

N/N Normal – horse does not have the PSSM1 gene.

N/PSSM1 Affected – horse has one copy of the PSSM1 gene.

PSSM1/PSSM1 Affected – horse has two copies of the PSSM1 gene.

Any buyer who makes a winning bid and signs (or so authorizes the signing of) the Buyers Acknowledgement of Purchase and Security Agreement is responsible for that purchase and cannot assign new ownership to a second party unless approved by Western Bloodstock LTD dba Triangle Sales. In the event a clerical mistake is made regarding the written entry of the final bid on the Buyers Acknowledgement of Purchase and Security Agreement, that correction will be made with no liability to Western Bloodstock LTD dba Triangle Sales. All disputes regarding final bids shall be settled by Auctioneer and/or sale recording.

NOTES: Finished money earning head horse. He will be legged up with 60 days of tuning and getting in shape with rope horse trainer and competitor Micheal Schafer. "Hollywood" is ready to rock and roll. There is no guess work to him, calm getting in the box, leaves flat with a strong face and good move, he's the real deal for a higher number roper or can be your main mount for the practice pen. Athletic and in tune enough for your lower number roper to have enough horse to work their way up to a higher number. This stout, pretty, gray gelding is sound moving and an easy keeper. He can work slow to fast steers and then turn around and compete at rodeo level. This horse loves his job, is easy to ride and

pretty to look at. Will be shown in the team roping preview.
