GENETIC TESTING

This catalog includes an explanation of AQHA Genetic Testing. Every effort has been made to supply known and accurate results.

DRAW SYSTEM FOR HIP NUMBERS

A random computer draw system is used to assign hip numbers.

When multiple horses with the same owner are drawn back- to-back, horses may be moved forward or backward ten lots in the order. Hip numbers for special productions/dispersals within a sale is determined by or on behalf of the owner.

AQHA HEALTH PANEL TESTING

Genes come in pairs; each parent contributes one copy to the offspring. With respect to the autosomal dominant genetic diseases listed below (HYPP, PSSM, and MH) only one defective gene is necessary to express the genetic disease in question. Such gene can be inherited from either of the parents or from both parents. With respect to autosomal recessive genetic diseases listed below (GBED and HERDA), typically, two copies of an abnormal gene (two copies = 1 pair) must be present for the horse to show signs of the genetic defect in question. Horses with only one copy of the defective gene are considered "carriers".

GBED – Glycogen Branching Enzyme Deficiency. Fatal disease of newborn foals caused by defect in glycogen storage. Affects heart and skeletal muscles and brain. Inherited as a recessive gene.

Possible results:

N/N	Normal – horse does not possess the disease-causing GBED gene.
N/G	Carrier – Heterozygous (one normal and one GBED gene).
G/G	Affected – horse has two copies of the GBED gene.

HERDA – Hereditary Equine Regional Dermal Asthenia. Skin disease characterized by hyperextensible skin, scarring, and severe lesions along the back of affected horses. Typical onset is around 2 years of age. Inherited as a recessive disease.

Possible results:

N/N	Normal – horse does not have the HERDA gene.
N/HRD	Carrier – horse carries one copy of the HERDA gene.
HRD/HRD	Affected – horse has two copies of the HERDA gene.

HYPP – Hyperkalemic Periodic Paralysis. Muscle disease caused by defect in sodium channel gene that causes involuntary muscle contraction and increased level of potassium in blood. Inherited as a dominant disease. Two copies of the defective gene produce more severe signs than one copy.

Possible results:

N/N	Normal – horse does not possess the disease-causing HYPP gene.
N/H	Hyperkalemic – Heterozygous (one normal and one HYPP gene).
H/H	Affected – horse has two copies of the HYPP gene.

MH – Malignant Hyperthermia. Rare but life-threatening skeletal muscle disease triggered by exposure to volatile anesthetics (halothane), depolarizing muscle relaxants (succinylcholine), and stress. Presumed inheritance as a dominant disease.

Possible results:

N/N Normal – horse does not have the MH gene.

N/MH Affected – horse has one copy of the MH gene.

MH/MH Affected – horse has two copies of the MH gene.

PSSM1 – Polysaccharide Storage Myopathy Type 1. Muscle disease characterized by accumulation of abnormal complex sugars in skeletal muscles. Signs include muscle pain, stiffness, skin twitching, sweating, weakness, and reluctance to move. Inherited as a dominant disease.

Possible results:

N/N Normal – horse does not have the PSSM1 gene.

N/PSSM1 Affected – horse has one copy of the PSSM1 gene.

PSSM1/PSSM1 Affected – horse has two copies of the PSSM1 gene.

Upon any such return, the owner will owe Western Bloodstock LTD dba Triangle Sales the sale expenses and sale commission (8%) or \$1,000.00, whichever is greater, and the cost of all veterinary services performed. All arrangements and expenses to return the horse are solely those of the owner.

It is the intent of Western Bloodstock LTD dba Triangle Sales to make every effort to record the entire auction which shall be used to settle disputes regarding statements made about horses while in the auction arena. In the event of disputes, the final veterinary examination and recording will be used to settle said dispute.

10 BIDDING PROCESS, DISPUTES, MALFUNCTIONS

The Auctioneer reserves the right to reject all bids. Should any dispute arise between two or more bidders, the Auctioneer shall settle said dispute and that decision shall be absolute, final, and binding on all parties. BIDS RECEIVED AFTER THE FALL OF THE AUCTIONEER'S GAVEL ARE NOT GROUNDS FOR DISPUTE.

In case two or more bidders claim the final bid, the Auctioneer may re-open the bidding procedure and ask for advanced bids, solely between the bidders having claimed the last bid. If there is no advanced bid, the horse shall be sold to the bidder from whom the Auctioneer recognized the final bid. If the bid should be reduced below the disputed bid, the Auctioneer may re-open the bidding with the highest bidder becoming the buyer regardless of whether the final bid equals or exceeds the original disputed bid.

After making a winning bid on a horse, a Buyers Acknowledgement of Purchase and Security Agreement will be completed by the buyer (or on behalf of the registered phone/online bidder) that will confirm the hip number and final sale price for invoicing and transfer. Any buyer who makes a winning bid and signs (or so authorizes the signing of) the Buyers Acknowledgement of Purchase and Security Agreement is responsible for that purchase and cannot assign new ownership to a second party unless approved by Western Bloodstock LTD dba Triangle Sales. In the event a clerical mistake is made regarding the written entry of the final bid on the Buyers Acknowledgement of Purchase and Security Agreement, that correction will be made with no liability to Western Bloodstock LTD dba Triangle Sales. All disputes regarding final bids shall be settled by Auctioneer and/or sale recording.

13 RESALES

If the highest bidder fails to immediately execute the Buyers Acknowledgement Of Purchase And Security Agreement or otherwise fails to comply with these terms or in the event of an announced mistake by the Auctioneer, Western Bloodstock LTD dba Triangle Sales reserves the right to accept the same purchase amount from another buyer, accept the next highest bid, put the horse up for sale a second time, or retain the horse for the owner as unsold. However, nothing shall prevent Western Bloodstock LTD dba Triangle Sales and/or the owner from pursuing whatever legal remedy may be available to compel the original buyer to perform as set out herein.

NOTES: This outstanding paint rope horse is kid-safe and can dial up easily for high-numbered ropings. He loves kids and can teach anyone to rope. Extra quiet in the box, he waits until asked to go and will score all day long. He rides outside, nothing bothers him, you can also breakaway on him. Will be shown in the team roping preview.

NOTES: "Sister" is an 8-year-old red roan grade mare standing 13.3 hands. She has been with us since our daughter was ten years old and is gentle, willing, and safe both on the ground and under saddle. Our daughter has heeled on her at ropings, and she has also been used to pen cattle with dogs. She is our first choice for beginners learning to ride and stays dependable even after months turned out. Will be shown in the team roping preview.
